

C.T.S.[®] RED POINT BARLOCK

- Once-only sealing
- 4-mm ($\pm 0.17''$) galvanized sheet steel
- Weight 1.92 kg (4.26 lb)
- From 230 to 460 mm (9" to 18")
- Up to 10-digit serial number

SOME LOCKS ARE SIMPLY CLOSED TO COMPETITION

Particularly our special-purpose locks. The Red Point Barlock, manufactured in-house, is a prime example.

Specially developed as customs seal. Each lock comes with a unique serial number of up to 10 digits. Also ideal for keeping out stowaways that could wreak financial havoc with your transport, not to mention the accompanying inconvenienc of delays and bureaucracy.

With the Red Point Barlock you will be protecting your interests in a highly constructive way. This hard-as-steel lock has an extremely efficient attachment method. All you have to do is hook the steel shackle behind the bars of the container or box and push the corresponding parts together until the desired position is reached. Once closed, the lock is sealed forever

If the lock is nevertheless forced, this will be visible from a great distance. The lock, with the conspicuous red point on the frame, will be missing, since it can no longer be attached to the container or box.

The Red Point Barlock is one of many security products for construction and transport manufactured by C.T.S.
